Subject: Stockholm syndrome

Dear ASV host and participant:

As you may already know, covert actors, covertly organized, guided and financially sponsored by state capitalism have created an uneven and often unlawful global business environment. It may be frustrating for many that those subversive actions inside another nation are not yet considered as global crimes! Those practices have tilted manufacturing and trade in favor of perhaps only one or two nations and most other entities or nations without covert state capitalism are becoming victims of brutal unfairness. It is almost impossible for small startups to go global independently. To make matters worse, shift in economy from agriculture to service has hurt farmers. Many farmers are leaving farming without knowing what else to do. This has unsettled rural economies. Wars also have created large scale dislocation of people who need basic services. Globally, the conditions are bad and many nations or business entities may be suffering from *Stockholm syndrome*! These problems need solutions!!

America going fully global in manufacturing and trade may be part of a remedy for the problems. But, existing trade infrastructure is centuries old. We present *Trade World Virginia* as a new model to address some of the issues. *TWV* plans to operate several overseas manufacturing zones *for the world*. *TWEX/NET* is a software layer that will connect everything together including trade exchanges and payments. We think, *TWV* presents a quantum opportunity in global services, manufacturing, and trade.

We encourage you to participate in this journey. Thank you.

Sincerely,

Dr. Afzal Hossain
President and Advisor
Trade World Virginia
